

NEWS & REMINDERS

If you have **confidential papers** and you would like them to be shredded (R1.95 per kg), please let the office know beforehand so that we can arrange to ring for them, or for the driver to look out for them. We can also drop off our purple shredding bags if you would like to pack your shredding into them ahead of time, so that they are ready for collection on the day.

As some customers know, we have been unable to recycle **PP (no.5)** packets up to now (the very crinkly bags such as used for salad leaves etc). Anyone who has been keeping them out of the recycling, please add them again as we finally have a home for them. Have a look at our website again for updated information on what we can take for recycling – especially the section on plastic.

<http://www.greencycle.co.za/whatcanberecycled.html>

For those of you who hate plastic shopping bags, we have sourced **reusable, fold-up bags**. They cost R25 each and are available in light and dark khaki (aka bieve and mushroom). Email or phone to order yours.

Louise will be away for the whole of August and September, so please contact Laura for any queries regarding collections, accounts, admin, Greencycle bags, marketing, procurement, HR, HSE, recyclable waste, jam jar sales, second hand stationery, confidential document shredding and in particular any offerings of stress release or meditation.

We are now working with Green Office to make sure that even more of your **ink cartridges** are given a second life. Remember to put them in with your other recycling.

Don't forget to give us your used **cooking oil** – just ensure that the bottle is securely closed so that it cannot leak and contaminate your other recycling. It goes to Greentech Biofuels where it is converted into biodiesel!

Going away? Remember we will credit you for 2 or

more collections if you let us know ahead of time that you will not have recycling to put out.

With winter drawing in, remember you can

save electricity by using your **cooking cushion**. Finish off your rice, porridge or stews in here instead of

simmering them on the stove. Those of you who don't already have one can purchase them from us for the bargain price of R110.

And finally... although we cannot recycle video cassettes, a big thank you to whoever sent in the Jane Fonda workout tapes, which I have taken home to leap about to! Once an 80s girl, always an 80s girl.
