

Green @ cycle

recycling collection service

Great news! There is now a way to keep all your chip packets, sweet wrappers and scrunchy plastic out of landfill. The Eco-brick Exchange are running a project, filling 2-litre plastic bottles with non-recyclable packaging and then using the bottles for building projects. Check them out: <https://www.facebook.com/pages/The-Eco-brick-Exchange/356852801090855> If you would like to stuff a bottle and send it in with your recycling, then we will gladly pass it on on your behalf. Here are some ideas of what wrappers you can stuff into your bottle..... it might also help to keep the kids out of mischief....

And there seems to be some confusion about the recycling of PET. **We can take all PET bottles** for recycling – they are used to make carpets and fleeces etc. We cannot take the PET containers (the ones that fresh fruit and sandwiches come in) – they are not recyclable in South Africa. So please send us all your bottles; some examples are shown below:
